

Ouch, don't push so hard!

Below is an example of a spreadsheet. To read it, you need to look at the cells. For example, if you were to look at cell A2, you would look across the top of the chart until you found A and then look along the side to find row 2. The word **atmosphere** is written in that cell. Look at the clues below each line and write the word on the line to read the hidden message. Some answers may be used twice.

C5	B3	D1	E2	B3
A2	D2	C3	E4	B3
E5	B3	A6	E4	B3
A4	E6	D5	F6	C6
D3	F1	B2	B6	

Table 1:

	A	B	C	D	E	F
1	predicted	air	pressure	weight	falls	can
2	atmosphere	be	low	presses	of	High
3	dry	the	down	skies	cool	rain
4	barometer	weather	changes	hot	on	heavy
5	degrees	light	when	to	earth	wind
6	needle	expected	sunny	storm	begins	rise

In your own words, explain the meaning of air pressure.
